

Thank you for downloading this template from [veero.net](http://veero.net)

## INSTALLATION & CONFIGURATION INSTRUCTIONS

Install this template by logging into your Joomla 1.5 administrator section and going to “extensions” from the main menu and then clicking on “Install/Uninstall”.

Browse for the zipped file you downloaded and hit the “upload file & install” button.

To make the new template the default one go to: “Extensions” and then “Template Manager”.

Check the box beside the new template and then click the “Default” button on the top-right hand side.

### To configure your template with modules:

Please look at the **template\_positions.pdf** file in this folder. It illustrates where all the positions are available.

Please note that any menus you use should be “Flat list” (right hand side when you’re editing a menu module)
